Lam Nguyen has experience working with various development stacks, including data pipeline, backend, and frontend. Currently, he is working as a data pipeline engineer, utilizing his skills to explore big data by building and maintaining high-performance systems.

Technical Skills

- **Programming Languages**: `Python` , `C` , `Javascript` / `Typescript` , `SQL` , `Bash`

- **Technologies/Frameworks**: `K8s` , `Docker` , `Rpm` , `Linux (Centos 7)` , `Jenkins`

Disclaimer: I have acquired these technical skills during work experience. Depending on my current work situation, I may forget some of these technologies.

Work Experience

Software Engineer, Data Pipeline Development

*at **Niometrics/ Mobileum** from Dec 2020 to Current*

I develop and maintain the data pipeline for the company's OLAP distributed system, focusing on batching jobs of the entire system.

Full-stack Web Developer

*at **Oursky** from Oct 2019 to Nov 2020*

Using Python, K8s, Docker, and Javascript, I built applications based on client requests, mostly with mono (all-in-one) applications that facilitates easy to setup and cost-effectiveness.

Software Engineer

*at **Onsolve** from Oct 2018 to Sep 2019*

I maintained and built features on the mass notification system (SMS, email, phone calls, etc.) using Python, PHP, and Javascript.

Bancassurance Sales Manager

*at **Prudential Vietnam** from August 2016 to Dec 2017*

- I worked with clients (banking) and the sales team to hit targets every month.

- I organized internal training and workshops.

- I set KPIs for the internal sales team.

Philosophy for Work

My work journey has gone through multiple different jobs/functions that did not seem to be related up until now. Some might say I don't have expertise in anything. They're right; I just chose a different path and define my expertise as "having no expertise." You may hire me for my flexibility in making things happen.
